Tailor solutions to maximise your profits and well-being

HEALTH

Alisios Corporation

Past experiences and current circumstances shape our clients' needs and are linked to the futures they can reach. At Alisios Corporation, our commitment is to provide high-quality services that help you plan and build the future you desire

Living in a healthy environment fosters socio-economic development in communities and promotes individual well-being. Monitoring and forecasting the environment is essential to enhance livelihoods

Our environmental suitability monitoring and prediction system helps organizations prepare for the impact of a changing climate on human health

"Medicine is a science of uncertainty and an art of probability"
William Osler

Alisios Corporation

HEALTH SERVICES

- Environmental suitability
- Disease forecasts
- Undernutrition forecast
- Sibila Rooms

Alisios Corporation

ENVIRONMENTAL SUITABILITY

By tracking environmental factors Alisios assess the capacity of the environment to hold viruses and vectors (e.g. mosquitoes)

Monitoring and forecasting environmental suitability plays a key role in improving resilience, protecting public health, conserving biodiversity and promoting sustainable development

- **Environmental suitability monitoring and forecasting**
- **Acompanying experts**
- **Sibila Rooms**

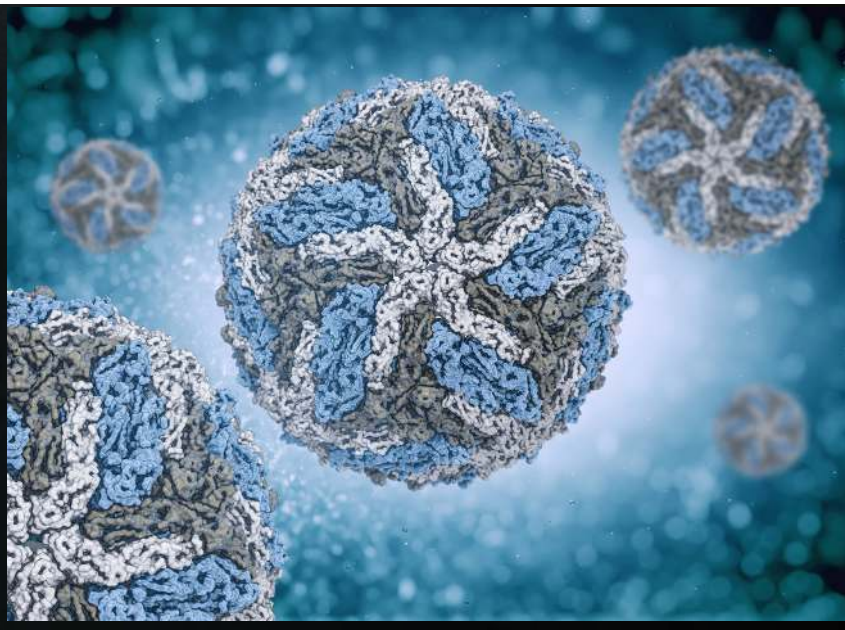
Alisios Corporation

DISEASE FORECASTS

Alisios' monitoring and forecasting systems of vector-borned diseases facilitate early intervention, resource allocation and strategic planning

- **Vector-borne diseases monitoring and prediction (M&P) systems**
- **Respiratory diseases and air quality M&P**
- **Accompanying experts**
- **Sibila Rooms**

These systems help control diseases, reduce mortality rates, optimise resource management, and increase the efficiency of both public and private healthcare systems



Alisios Corporation

UNDERNUTRITION FORECASTS

Monitoring and forecasting undernutrition cases provide essential information for public health and socioeconomic development matters

Servicing undernutrition forecasts 3 and 6 months in advance allows for decision-makers, policymakers, and humanitarian organisations to develop strategic interventions and allocate resources more efficiently

This enables:

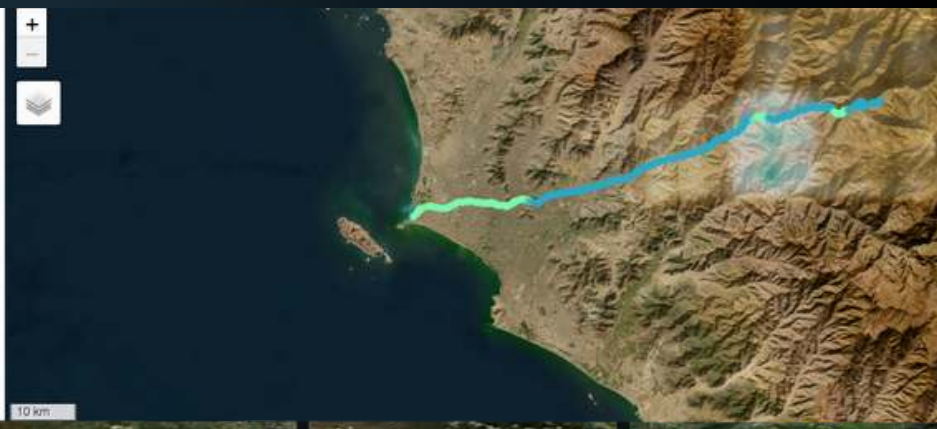
- Better resource management and allocation
- Planning and developing specific strategies to combat undernutrition

Alisios Corporation

SIBILA ROOM (™)

In a world saturated with information, the power to act depends on how you interpret it

Sibila Room gives you that power



Decide which monitoring and forecasting services you want to see, how and when. On your computer, tablet or phone. Generate maps, graphical and text reports instantly, and share them with whomever you want. In ancient times, people had to find the sibyl's chamber in a cave to know the future. Today we bring it to the palm of your hand
